American People

MITHDRAW SAVINGS--BUY, BUY, BUY STOCKS

Whenever I advise the people to huy or sell a how! goes up ther I am talking for my pocket. Callier's says "Lawson is sincere but hysteri-cal." The System's press agents say "Lawson is an instructe cold-blooded speculator out for the

One orders, but
One and all agree I know the stock spine.
It matters not to me what any of them say,
provided the American people will follow my advice they are following it in constantly increasing

Absorb the following details of just what this advice means and try and find wherein it can harm any but the System.

Buy only regular dividend-paying stocks.

Buy only stocks dealt in on the Boston, New York, London, Paris or Berlin Stock Exchanges.

Pay for what you buy in full, have the stock put in your own name and take physical possession of the certificate.

Under no circumstances buy any stock on man

Under no circumstances buy any stock on margin, or any stock not paying a dividend, or any stock
not already listed on (that is, already investigated
by) the Boston, New York, London, Paris or Berlin
Stock Exchanges, and buy no stock but through a
banking or brokerage house which has membership
in one of these Exchanges. (The advice contained
in this fourth clause I intend to apply only to the
investing of money drawn from savings banks
that is, "sacred" money.)
For the first time in finance the people have
the System just where they should have them for
the people's good for the System's annihilation.

The people at last are in the saddle, the System
under foot, where they can be trampled out of existence.

Listen then compare what I say with the word

slush of the System's press agents:

Three years ago by writing and by public speaking I began showing the inside workings of the System insurance, banks, trust companies, railroads, Standard Oil and all the thousand and one robbing devices by which the people were plundered of their billions of surplus earnings.

The goaded thieves said, "He's crazy"; the people, "He's mad." I kept to my knitting. Soon those in high places said, "Show us" they were shown. Right away the people saw who was mad. Then the time came to supplant talk with action and the world saw the December (the Lawson) panic. The panic came because I advertised "Sell, sell, sell, now at the top. Get your money, let the System have your stocks, and when the System can take no more, because they cannot have your money to buy with, you, the people, will shake out their stocks ar slaughter prices, as it has been the System's custom to shake out the people's." The goaded thieves of the System said, "We will prove him a liar," and as the people sold the System bought and would not allow prices to go down. After a little they had the stocks and the people the money, and the dead-lock between the System and the people was on. Then it was that those in high places struck, and the System, panic-stricken, were compelled to slaughter their stocks as in other times the people had been compelled to slaughter theirs. Now the issue is clear.

Stocks are low, yet the System must sell. Its master minds, frantic at the verdicts of the courts. demanding repayment to the people of the money stolen from them, see the handwriting put upon the

"In the future the actual owners of corpora-tions will control them and receive all benefits accruing from them," see that further resistance means The people have \$4,000,000,000 in savings banks, only earning 4 per cent. per annum, but directly and indirectly loaned out to the System, for whom

it earns 14, 24 and 124 per cent, per annum.

If the people withdraw their savings and exchange them for \$4,000,000,000 of good stocks, they, the people, will not only have the power formerly possessed by the System, but they will increase their savings 50, 100 and 150 per cent., and while doing so will receive 8 to 12 per cent. on their savings. where they now receive but four.

For instance: \$75 now deposited in savings bank, receiving \$3 interest per year, will buy one share of Amalgamated Copper stock, which will return the purchaser \$8 each year, and when the price of Amalgamated gets back to \$122, where it was the other day before the System became panic-stricken, each one who has bought a share can sell and redeposit in the bank \$122, or can continue to where he now receives but four. In addition, at the annual meeting of the Amalgamated Company the people can turn the Standard Oil-System thieves out of control and put in their stead trustworthy men of the caliber of Governor Hughes of New York or President Roosevelt.

Again: \$125 now deposited in savings bank, earning \$5 interest each year, will buy one share of Union Pacific Railroad stock, which will return \$10 interest each year, and when the price gets back to the \$196 it sold at the other day each buyer of a share can sell and redeposit \$196 in place of the \$125 withdrawn. Or he can retain the stock and continue to receive double the amount he now re-

Must now the thing for the people to do is

Withdraw their deposited savings and buy stocks
before prices have advanced ton far.

The people should not be influenced by impleeding statements put affort for their confusion by
the System's agents.

Here are the questions, the horse sense anwers to which will point the people the true road
to take at this critical juncture of their affores:

Pirot. Are good stocks as safe as savings
banks? There are four hillion dollars in savings
hanks. They are kept loaned out must be hopinanced out to earn 4 per cent, per annum. They
could not be kept loaned out unless the collareral
upon which they are loaned embraced the best industrial institutions of the country institutions
upon which billions of good stocks are based. If
good stocks are going to the bow wows, savings banks
must go with them.

Second. Will President Roosevelt's war on
corrupt corporation controllers hurt good stocks?

Social. Will President Roosevelt's war on corrupt corporation controllers hurt good stocks?

Every blow President Roosevelt strikes at corrupt corporation controllers enhances the value of good stocks means that the large portion of the earnings of corporations which have been fraudulently diverted by their controllers to themselves and their pals will remain with the corporations.

Third. Will the price of good stocks surely advance from the present low level?

The fact that there are four billion dollars of the people's savings earning only 4 per cent, per year means that capital is content with 4 per cent, which in turn means that once American corporations are placed in the hands of honest managers the securities based upon them will advance until prices reach a 4 per cent, basis. This means at least the doubling of present prices.

Fourth. Can the System now do snything to destroy the people's investments?

destroy the people's investments?

The only power the System has ever had to destroy the people's investments in good stocks was the power to scare them into selling at slaughter prices after they, the System, had induced them to buy at the top—artificially made high prices. The System has no control over the people's investments in good stocks when the people buy at the bottom and sell at the top and confine their purchases to what they can pay for in full.

Once more, withdraw savings and buy now. Bear in mind every day's delay means higher prices.

Bear in mind every day's delay means higher prices.

Last week when I advertised, Amalgamated could have been bought at 65, Union Pacific at 120. Now 75 and 130 will have to be paid.

P. S. Another illustration which will bear mulling over: Steamship King Morse has captured all the Atlantic coastwise steamships, has put them into a gigantic corporation, the Consolidated Steamship Company. Before consolidation the companies embraced were earning \$3,500,000; by savings the carnings have been increased to \$4,500,000. The Steamship King has placed \$60,000,000 of 4 per cent. bonds on the market. They are down to 25, that is, \$100 buys four, and the four return \$16 per annum is, \$100 buys four, and the four return \$16 per annum interest on the \$100 invested. Steam Morse before the recent slump staked his reputation that some day these bonds would sell at four times their present price. Does any sane man think that Steamship King Morse is anxious to have the people withdraw their savings and secure these bonds are the savings and secure these bonds are the savings and secure these bonds are the savings and secure these bonds are savings and secure these savings are savings and secure these savings are savings and secure the savings are savings and secure these savings are savings are savings and secure the savings are savings and secure these savings are savings and secure these savings are the present low price made by the System's panic, or does he reason that Steamship King Morse and his associates prefer to borrow the people's savings at 4 per cent., thereby making three times 4 per cent., and later, when these bonds are 65 or 75 and on their way to 100, let the people exchange their savings for them? I give this as one of many cases that should make savings bank depositors ponder and

seek an answer to: If our deposited savings are being used in the creation and maintenance of the country's industries so as to return net earnings to these industries of R. 10 and 12 per cent. per annum, why should we receive but 4 per cent. when, by making ourselves the owners of these industries by the purchase of their

stocks, we can secure all the earnings? P. S. 2. Already the people's buying is be-ginning to tell. The financial reports for the past week are filled with "Everyone is remarking on the unprecedented number of orders received by Stock Exchange houses for odd lots, all of which are being paid for in cash and taken out of 'the Street,' " and "Savings bank officials all over the country report the withdrawal of deposits for the purchase of stocks." ask Wall Street to watch this new process for awhile

longer, when it will be astonished at its volume.
P. S. 3. Can any sane man fail to see the radical change in the times? When I first crucified Standard Oil the people were horror-struck. Stuyvesant Fish, ex-President of the Illinois Central Railroad, one day last week punched the present President of the Illinois Central in the face and uppercut him as he dropped under the Directors' table, yet the whole world, from Concord to Oshkosh, from Newport to Beeswing Centre, yells, "Bully for you, Styve. Poke him again; kick his slats."

THOMAS W. LAWSON

Boston, September 3, 1907.

Let the American people make no mistake. I said long before President Roosevelt and the muckrakers began to work, "The System is a gigantic thief, Standard Oil its leader."

The people said, "Even if it is true, they are too powerful to be punished."

Only three years after, the insurance grafters are dead, in sanitariums or exile, the Standard Oli is fined \$29,000,000 in a single case, and I am still knitting away at Frenzied Finance. History will repeat itself. The four billion dollars of the people's savings shortly will be found in the ownership of the industrial institutions of the country, and the stocks based on these institutions will be worth, and will be selling at, double their present price, and the great questions of the day will be settled-

PAWNBROKERS SALES.
